

QUESTIONS AND ANSWERS

Reference is made to RFQ for Purchase of CNC Machine in Support Of Women Entrepreneurship (UNOPS-EP-2016-G-016).

Question n. 1 regarding the Engraving Size of 1000mm x 900mm:

Does the machine which has a 1220mm x 610mm working area and foldable sides - which effectively allows the actual material to be of infinite length or width, whereas the program allows for continual engraving – comply with the request?

Answer: n. 1: The Engraving size refers to minimum size of the material which can be processed on the machine and not to machine working area. Therefore, the machine with extendable working area which allows processing of the material of the above mentioned dimensions is acceptable.
