Section III: Schedule of Requirements - Terms of Reference

For provision of consultancy services for protection of designation of origin and geographical indication for three traditional products

1. The Background

European PROGRES is a multi-donor Programme, financed by the European Union (EU), the Government of Switzerland and the Government of Serbia, designed to support sustainable development in the South East and South West Serbia. The Programme has been conceptualised jointly with the European Integration Office of the Government of the Republic of Serbia (SEIO), whose responsibility is to monitor implementation and provide assistance and facilitation. The United Nations Office for Project Services (UNOPS) has been granted with an initial budget of 17.46 million Euros and has the overall responsibility for the Programme implementation.

Through a multi-sector approach this Programme will contribute to sustainable development of underdeveloped areas and creation of more favourable environment for infrastructure and business growth by strengthening local governance, improving vertical coordination, planning and management capacities, improving business environment and development, as well as enhancing implementation of social inclusion and employment policies.

The Programme works towards achieving four main results, while good governance principles are interwoven as a crosscutting aspect of the entire intervention:

1. Strengthened local governance, planning and management capacities through introduction of new, or improvement/elimination of existing procedures and processes in line with the principles of good governance
2. Increased competitiveness of local economy through improved business environment and management/organisational capacities of small and medium enterprises/agricultural cooperatives
3. Improved access to employment, offering equal opportunities to both men and women, and social inclusion of the most vulnerable and marginalised groups through development and implementation of local policies resulting in reduced migration from South East and South West Serbia
4. Effects of Serbia's European accession communicated to general public.

The final beneficiaries, but also the key stakeholders and financial contributors of this Programme are 34 local governments from the third and fourth group of development level, which have the responsibility of taking ownership of activities implemented in their territory:

- Novi Pazar, Raška and Tutin in the Raška District
- Nova Varoš, Priboj, Prijepolje, Sjenica in the Zlatibor District
- Ivanjica in the Moravica District
- Prokuplje, Blace, Žitorađa, Kuršumljija in the Toplica District
- Leskovac, Bojnik, Vlasotince, Lebane, Medveđa and Crna Trava in the Jablanica District
- Vranje, Bosilegrad, Bujanovac, Vladičin Han, Preševo, Surdulica and Trgovište in the Pčinja District
- Brus in the Rasina District
- Aleksinac, Gadžin Han, Doljevac, Merošina and Svrlijig in the Nišava District
- Babušnica, Bela Palanka in the Pirot District
- Knjaževac in the Zaječar District.

Other beneficiaries include institutions founded by LSGs and public utility companies, civil society organisations (CSO) and media in the participating LSGs. It is the inhabitants of the South East and South West Serbia who will feel the biggest benefits of the Programme.

2. Introduction to the Intervention

A geographical indication (GI) is a sign used on products that have a specific geographical origin and possess qualities or reputation that are due to that origin. In order to function as a GI, a sign must identify a product as

originating in a given place. The certification of products with GI is a guarantee for consumers that a product has the unique combination of local natural resources and tradition, knowledge and skills that are often passed on from generation to generation within a certain territory. The use of GI allows producers to obtain market recognition and often a premium price.

Many Serbian products have the potential to increase their markets through GI certification. Moreover, since the certification links products with territory, in synergy it contributes to promotion of a specific region and contributes to broader economic impact. Recent studies show that market demand for products with added value has increased over the last decade.¹

According to the law, there are two types of GIs for agricultural products² in Serbia:

- Protected Designation of Origin (PDO), which is the geographical name of a country, region, or locality, i.e. "a product originating therein, whose quality and special characteristics are exclusively or essentially due to the geographic environment"
- Protected Geographical Indication (PGI), which identifies a particular product as a product originating from the territory of a particular country, region or locality in that territory, where a particular quality, reputation or other characteristic of the product is essentially attributable to its geographical origin and whose production and/or, processing and/or preparation take place in a particular limited area.

According to the Assessment of Agriculture Producer Groups and Geographic Indication³ commissioned by the Programme, there are a big number of traditional dairy and meat products that may be protected in the Programme territory. Such products may be supported in the process of elaborated study development, or by provision of a general technical support that would include increasing the level of knowledge related to elaborated study development and certification of authorised users of GI.

In September – December 2015 period, European PROGRES conducted a Call for Proposals for Provision of Support for Protection of Geographic Origin⁴ inviting eligible entities to apply for support for PDO, PGI and certification of authorised users of geographic indication.

As a result, one product is selected for support for PDO and two products for support for PGI are selected:

Product	Type of protection	Applicant
Sjenica Stelja (Sjenička stelja)	Protected Designation of Origin	The Association of producers of Sjenica lamb
Ivanjica Potato (Ivanjički krompir)	Protected Geographical Indication	Municipality of Ivanjica
Vlasina Honey (Vlasinski med)	Protected Geographical Indication	Municipality of Surdulica

3. Objectives of the Intervention

Overall objective: Increased competitiveness of local economy through improved competitiveness of products.

Specific Objective: Produce three Elaborates on specific characteristics of traditional agriculture and food products in line with requirements as stated in the Law on Indications of Geographical Origin and Rulebook on the content of the request for registration of geographical origin.

4. Approach to the Intervention

The European PROGRES will through an open and transparent process evaluate, select and contract an eligible legal entity (see below for details on eligibility) which has responded to the Request for Quotations
